

Adult Gender Affirming Genital Surgery

Frequently Asked Questions

What type of vaginoplasty do you offer?

Within the Department of Urology, we offer penile inversion vaginoplasty in adults (18+ years old).

How long will I have to wait for surgery?

If you meet pre-operative criteria, you may be eligible to schedule a surgical date within the year.

Do I need letters for surgery?

Yes. The Department of Urology follows the World Professional Association for Transgender Health (WPATH) guidelines, and letters are required for pelvic surgery.

Do I need to completely stop hormones to have surgery?

No. Your estrogen dose will be lowered in the immediate preoperative and post-operative period, but it will not be completely stopped.

What is the post-op care pathway?

For vaginoplasty: Local 7 days after surgery; Follow-up 2 weeks, 6 weeks, 12 weeks, 6 months, 12 months

For Orchiectomy: Same day discharge; Follow-up 6 weeks

For hysterectomy: Same day discharge; Follow-up 6 weeks

Do I need to dilate after full depth vaginoplasty surgery?

Yes, however frequency of dilation varies for adults based on time from surgery.

Do I need to dilate after zero depth vaginoplasty surgery?

No. Only the external vulva structures are created in adults during zero depth vaginoplasty surgery, so there is no vaginal canal.

Do I need to have hair removal?

This depends on the type of vaginoplasty you are having. For full depth vaginoplasty with creation of vaginal canal in adults, hair is required. For zero depth vaginoplasty without creation of vaginal canal in adults, no hair removal required.

Who will be my provider and what type of training do they have?
